

**Tippecanoe County GIS Council
Meeting
February 14th 2005**

Council Members and Attendees: President; Steve Murray; Commissioner KD Benson; Highway Director Mark Albers; APC Director Sallie Fahey; Captain Rick Walker; MITS Director Diane Hawkins; GIS Khalid Hasan; Patrick Lockwitz; Keith McClendon;

The items listed on the agenda today are as follows:

- 1. 2005 Goals**
- 2. GIS Action Plan Revision, Feedback requested**
- 3. APC Bentley Redline: updates**
- 4. 911: Address/ Centerline Data Management and Maintenance**
- 5. NPDES Phase II Updates**
- 6. Other Business**

1) 2005 GOALS

APC Goals For 2005

Sallie Fahey outlines the goals for APC for 2005.

The number one goal for APC is zoning. Mike Lana will be devoting 10 hours a week towards zoning in one of the rural areas. She would also like to have all of her her staff trained on Bentley Red Line.

Khalid has found a program called Deed-Check, which APC will try

out so the planners can draft legal descriptions onto a map themselves. Krista Trout has been working on making the FEMA insurance rate boundaries more legible. She would like to continue this. APC has new DNR floodplain studies and APC would like to have those in GIS. Also, APC would like to become compliant with digital ordinances.

Future goals for APC with GIS

- a. Zoning as a layer
- b. Bentley Red Line Proficiency
- c. Deed-Check Program
- d. Krista Trout FEMA/FIRM
- e. Authorization CTP FEMA DNR Floodlains
- f. Digital Ordinance
- g. Base Map Created
- h. Don Lamb/ Krista Trout backup
technical committee
- i. Land Use
- j. Street Addressing
- k. Census
- l. Transportation
- m. Cemetery
- n. Jay

President Steve Murray asks that all departments outline their short, and long term GIS goals and bring them to the meeting in writing.

2) GIS Action Plan Revisited

Diane requests that the GIS Action Plan updated.

3) Bentley Red-Line Updates

Khalid has been assisting APC with beginning to use Bentley. Highway, Surveyors, and Health are already using the Bentley to help them with manipulating the maps and printing of the maps.

4) 911 Phase II Updates

Diane introduces Rick Walker to the board members as he is the new 911 Director. Diane is working with Schneider and Rick to try to get him up to speed on the project. The project should be complete in another month. Responsibility for maintenance of the 911 data has not been established yet. Sally and Diane discussed the erroneous addressing of certain properties and areas. Khalid and Diane are planning to look at how addressing is achieved from beginning to end and the agencies involved.

Sallie will also be looking into APC's responsibility in regard to addressing.

5) NPDES Phase II Updates

Steve Murray discusses the entities that must comply with the clean-water act. These entities are Purdue, Ivy Tech, Lafayette, West Lafayette, Tippecanoe County, Battleground, Dayton and Shadeland. 7 of the 8 have been working together to develop the planning permits and ordinances to comply with this federal mandate. Part C will be filed March 4th, which will map out the plan for compliance. This requires looking at storm water quality as well as quantity. Steve discusses a possible per household fee to help offset the cost of compliance. Compliance will increase the paperwork load for many different departments. Failure to comply will result in fines or possible jail time. Steve is trying to get approval for a storm-water coordinator position to handle the inspections and paperwork. A software program is being purchased to help document compliance. Steve will be giving a more formal update before next month's council meeting.
